PROJECTS

FixItLocal | JavaScript, Flask (Python), HTML, CSS, AJAX

- Implemented real-time messaging using JavaScript and AJAX for seamless user interactions.
- Developed automatic scrolling functionality to ensure a smooth user experience in the chat interface.
- Integrated Flask backend to process user queries and generate AI-driven responses.
- Designed an interactive UI with HTML, CSS, and Tailwind for a responsive and user-friendly experience.
- Optimized chatbot performance by ensuring quick data retrieval and dynamic content updates.

Smart Automated Sports Referee System (SASRS) | React, Flask, Pytorch, OpenCV, TensorFlow

- Developed an AI-driven automated referee system capable of processing live video feeds across multiple sports (e.g., football, basketball, tennis, cricket) to deliver real-time, accurate officiating decisions.
- Designed a modular, rule-based decision engine that integrates sport-specific rules and sensor data to minimize human error and enhance fairness.
- Implemented containerization with Docker and CI/CD pipelines to ensure scalable, reliable deployments and smooth integration with existing sports analytics platforms.
- Collaborated within an agile, cross-functional team to iterate on system performance, incorporating real-world testing feedback to continuously improve accuracy and response time.
